Mission Statement.

"Leading the industry, Kirk Marketing is dedicated to building a sustainable visual brand, that generates prosperity for all its stakeholders. This is achieved through commitment to our products, clients and staff, with uncompromising integrity, based on our **Magnificent Seven differentiators.**"

Magnificent Seven - Differentiators.

1. 90% success rate in specification. We maintain this by promoting our unique Kirk Product Library File through targeted advertising campaigns, on line specification platforms, our in-house quoting system and the unrivalled expertise of our sales team.

2. Brand leadership. Four out of our ten brands are already market leaders and we have plans to ensure the remaining six will soon follow.

3. Market coverage. We have established a loyal customer base throughout South Africa which we serve from our four Kirk branches. In the rest of Africa we operate through our growing network of Kirk Distributors.

4. Our own Manufacturing and strong Supplier Partnerships. This allows us to create unique products and significantly improve our flexibility and competitiveness, while offering strong potential for growth.

5. Unique IT platform. Our proprietary IT system, which contains a database that has been developed over 20 years, is a powerful differentiator and driver of worldwide growth.

6. Effective Management. Our management systems allow for delegated decision making, improving response times from a well-trained Management Team that is fully aligned with our purpose and mission, ensuring longevity and passion in our company.

7. Our People - the heart of our family business. With a Profit-Sharing Scheme, training programmes incorporated into the company's daily life and the Kirk Trust focused on creating new employment, we continuously demonstrate that it is our people who make the difference.

TOOLS

THE GOLD STANDARD
PRECISION • STRENGTH • DURABILITY

INTRODUCTION

Kirk Marketing natural evolution of products, after forming its original M.Trim brand was the formation of the MTools brand. Kirk's 2nd brand represents quality tiling tools brand. The Tools selected are unique for the DIY enthusiast and Contractor's needs.

Currently we have a large range of manually operated tiling tools and expect to incorporate a range of electric tools in the future.

Kirk represents under our MTools brand, both Bihui large format tiling tools and the Italian brand Battipav which offers professional manual and electric tile cutters.

MTools comprehensive range of tiling tools are shown by the picture thumbnails on this page. They include products such as manual tile cutters, diamond blades, trowels, grout removers, drill bits, suction pads, tile spacers and levelling systems, adhesive and grout tools, knee pads, cutting and shaping tools, mallets and hammers, and much more.

We also include a comprehensive range of Cleaning Tools as well as a few Carpet tools, and Laminate tools.

MTools have a tiling tool stand, as well as two different manual tile cutter stands, to display our smartly packaged tools and tile cutters in retail stores. As a retailer you can feel confident you can sell MTool products to the public as every item has comprehensive use instructions, making it easy to identify and use.

Adhesive and Grout Tools

When installing tiles, various tools are required to mix and apply tile adhesive and grout. The range comprises mixers, plastic adhesive spreaders, grout squeegees and other grout application tools.

Description:

A four-sided plastic adhesive spreader for general adhesive work. Various notch designs on each side.

Dimensions:

Length: 165 mm
Width: 115 mm
Height: 2 mm

Multi-Plastic Adhesive Spreader

MTPAS.M

Description:

10x10mm Plastic Adhesive Spreader. Used to spread and key adhesive on floors.

Dimensions:

Length: 150 mm
Width: 70 mm
Height: 2 mm

Plastic Adhesive Spreader (10x10mm)

MTPAS.10

Description:

6x6mm Plastic Adhesive Spreader. Used to spread and key adhesive on walls.

Dimensions:

Length: 115 mm
Width: 70 mm
Height: 2 mm

Plastic Adhesive Spreader (6x6mm)

MTPAS.6

Description:

Plastic spreader and scraper (4 pack) 50,80,100,120mm. General DIY and grout application

Dimensions:

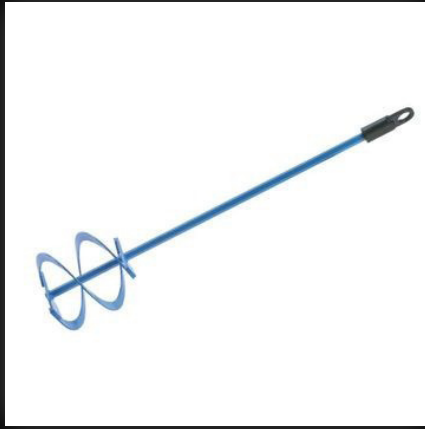

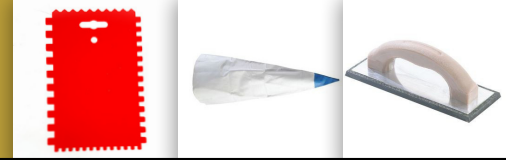

Length: 6 mm
Width: 135 mm
Height: 180 mm

Plastic Spreaders 4-Pack

MTPS.4

Adhesive and Grout Tools

When installing tiles, various tools are required to mix and apply tile adhesive and grout. The range comprises mixers, plastic adhesive spreaders, grout squeegees and other grout application tools.

Description:

A mixing whisk to fit a standard drill for DIY mixing of tile adhesive and grout. Can also be used to mix glue. Max capacity 20kg.

Dimensions:

Length: 80 mm
Width: 80 mm
Height: 430 mm

Adhesive & Grout Mixing Whisk
400mm DIY MTAMIX.400

Description:

Multipurpose squeegee (10mm). To apply and key adhesive on floors. Squeegee is used to apply grout to tile gaps.

Dimensions:

Length: 180 mm
Width: 80 mm
Height: 9 mm

Multipurpose Squeegee 10mm
MTMSQ.10

Description:

Multipurpose squeegee (6mm). To apply and key adhesive on walls. Squeegee is used to apply grout to tile gaps.

Dimensions:

Length: 125 mm
Width: 95 mm
Height: 6 mm

Multipurpose Squeegee 6mm
MTMSQ.6

Description:

Rubber float. Used as an alternative tool to apply grout to tile gaps. More control than a squeegee.

Dimensions:

Length: 240 mm
Width: 100 mm
Height: 80 mm

Rubber Float
MTRF

Description:

200mm Squeegee to apply grout to tile gaps. Stiff rubber blade suitable for larger grout gaps.

Dimensions:

Length: 200 mm
Width: 80 mm
Height: 20 mm

Wooden Squeegee 200mm
MTSQ.200

Description:

300mm Squeegee to apply grout to tile gaps. Stiff rubber blade suitable for larger grout gaps.

Dimensions:

When installing tiles, there are often obstructions to tile around; door frames, toilets and plumbing pipes are common obstacles. This range comprises various tools for cutting, nipping, shaping and finishing the various shapes.

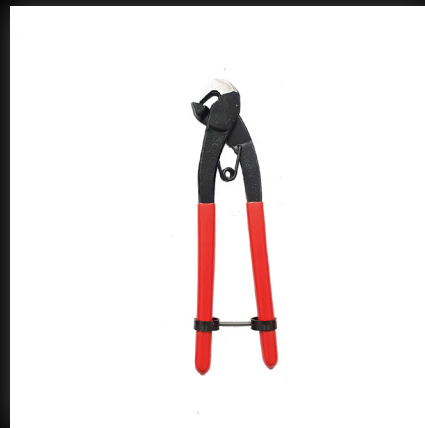

Description:

Tile breaker pliers for free-hand scoring and breaking of thin wall tiles. Plastic breaker

Dimensions:

Length: 40 mm
Width: 80 mm
Height: 300 mm

Tile Breaker Pliers

MTTB

Description:

Tile scribe is used to score freehand on tile surface, handy for curves and shapes before nipping.

Dimensions:

Length: 15 mm
Width: 50 mm
Height: 195 mm

Tile Scribe

MTTS

Description:

Mosaic cutter spare cutting wheels supplied in a 2-pack.

Dimensions:

Length: 10 mm
Width: 90 mm
Height: 150 mm

Spare Cutting Wheels for Mosaic Cutter

2-Pack MTMC.2SW

Description:

Mosaic cutter spare titanium cutting wheels supplied in a 2-pack. Longer lasting with titanium coating

Dimensions:

Length: 10 mm
Width: 90 mm
Height: 150 mm

Spare Titanium Wheels for Mosaic Cutter

2-Pack MTMC.2SWT

Description:

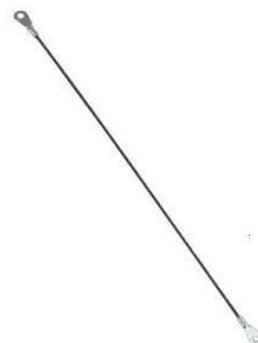

Rod saw with blade (300mm). Used to drill and cut shapes out of thin ceramic tiles.

Dimensions:

Length: 470 mm
Width: 195 mm
Height: 40 mm

Rod Saw and Blade (300mm)

MTRS&B.300

Description:

Rod saw blade (300mm). Spare blade for rod saw frame.

Dimensions:

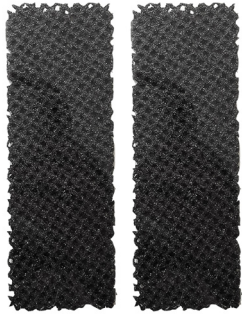

Length: 5 mm
Width: 45 mm
Height: 365 mm

Spare Blade for Rod Saw (300mm)

Drill Bits

When drilling through tiles, there are specialist drill bits required. The Tile and Glass-type drill bit with its arrow head construction is suitable for softer ceramic tiles, while the diamond drill bits are more suited to harder tiles like porcelain. Cooling these drill bits during use extends the life-span.

Description:

Diamond drill bit 6mm. Cool tip with water during drilling to prolong life. Expect +/- 20 holes per bit.

Dimensions:

Length: 18 mm
Width: 90 mm
Height: 147 mm

Diamond Drill Bit 6mm

MTDBIT.6

Description:

Diamond drill bit 6mm. With cooling wax in shaft to prolong life while drilling. Expect +/- 20 holes per bit.

Dimensions:

Length: 20 mm
Width: 96 mm
Height: 167 mm

Diamond Drill Bit Dry 6mm

MTDBIT.D6

Description:

Tile & glass drill bit (6mm). Used to drill holes through glass and ceramic tiles. Cool in water while drilling. Expect +/- 20 holes per drill bit.

Dimensions:

Length: 8 mm
Width: 77 mm
Height: 135 mm

Glass Drill Bit 6mm

MTTGB.6

Description:

Variable drill hole cutter with movable bit to cut holes through thin ceramic tiles.

Dimensions:

Length: 30 mm
Width: 95 mm
Height: 160 mm

Variable Drill Hole Cutter

MTVDHC

Grout Removers

Removing grout is required from time to time and there are various Grout Removers available for this purpose. Grout is removed for various reasons, grout colour change, effective removal of mould, removal of damaged tile, as a few examples. Blades with serrated edges are effective in thin grout gaps and with fresher grout. The carborundum-edged blades are for grinding out hard or old grout. All tools in the range have spare blades available.

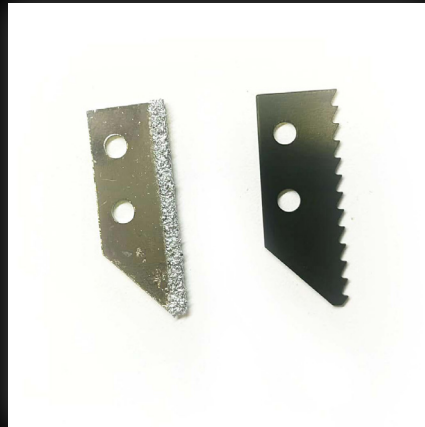

Grout Remover 2-Piece Grout Saw
MT2GS

Description:

Grout Remover that can take a serrated or carbide blade to suit old and new grout. Replacement Blade Sets available.

Dimensions:

Length: 30 mm
Width: 105 mm
Height: 280 mm

Spare blades for MT2GS
MT2GS.B

Description:

Replacement Blade Set for 2-Piece Grout Saw.

Dimensions:

Length: 135 mm
Width: 80 mm
Height: 5 mm

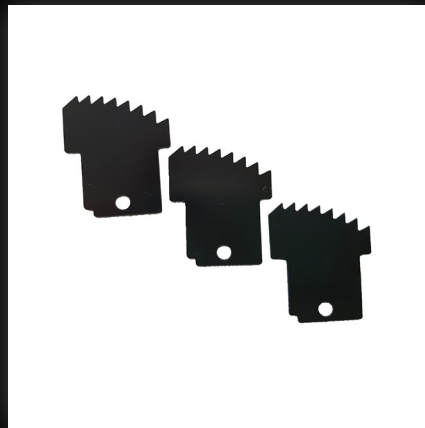

Grout Remover Reusable
MTGRR

Description:

Grout Remover for small areas with replaceable blade.

Dimensions:

Length: 10 mm
Width: 90 mm
Height: 200 mm

Spare Blades for MTGRR
MTGRB

Description:

3-Pack of spare blades for MTGRR grout remover.

Dimensions:

Length: 6 mm
Width: 80 mm
Height: 140 mm

Grout Removers

Removing grout is required from time to time and there are various Grout Removers available for this purpose. Grout is removed for various reasons, grout colour change, effective removal of mould, removal of damaged tile, as a few examples. Blades with serrated edges are effective in thin grout gaps and with fresher grout. The carborundum-edged blades are for grinding out hard or old grout. Manual Tile Cutters

The MTools range of manual tile cutters covers options for basic ceramic tiles up to thicker porcelain tiles. Econo cutters are excellent value for money when cutting ceramic tiles, whilst the Slimline range of semi-pro cutters is a good, basic cutter for porcelain tiles. The Semi Pro cutter range is an excellent all-round machine for cutting both ceramic and porcelain tiles, whether straight cuts or diagonal cuts are needed. There are also sizes to match all common tiles used in the market today.

Description:

Scoring wheel for 430mm Econo tile cutter. 15×1.5mm with a 6mm arbor hole.

Suction Pads

This is becoming an important category in tiling tools with the introduction of larger format tiles. The suction pad helps the installer fit these tiles quickly and easily, whether on the floor or wall.

Description:

Double suction pad. Used to pick up, lift or move large tiles and glass sheets. 80kg capacity.

Dimensions:

Length: 115 mm
Width: 320 mm
Height: 150 mm

Double Suction Pad 80kg Capacity
MTDSP:80

Tile Spacers and Levelling Systems

To achieve a neat and uniform tile installation, spacers are required to give even, accurate grout gaps. This results in the right finish when tiling any area, but especially very large areas. The recent introduction of tile levelling systems also ensures that all tiles are installed flat with no lippage in the corners where tiles meet. The MTools range has a Clip and Wedge Levelling option as well as a Reusable System, along with the standard X Tile Spacers.

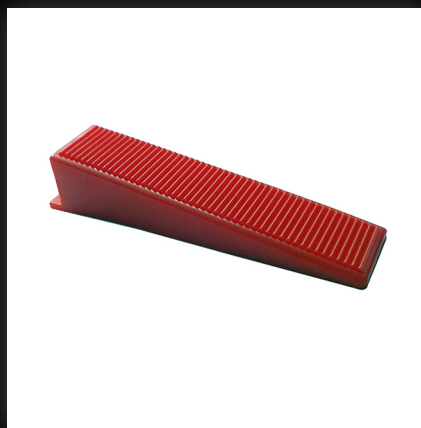

Description:

A reusable levelling system for all tile types with grout gaps up to 6mm wide. Insert, turn 90 degrees and hand tighten the screw. Use supplied spanner with heavier tiles. Easy to remove, clean and re-use.

Dimensions:

Length: 310 mm
Width: 220 mm
Height: 60 mm

Reusable Tile Levelling System
MTRTLS

Description:

Leveller Wedges are re-usable and are inserted into the Clips to pull and push tiles to the same level to ensure a flat installation.

Dimensions:

Length: 65 mm
Width: 210 mm
Height: 280 mm

Tile Spacer & Leveller Wedges Large
MTTSL.WL

Clip & Wedge Levelling System

Description:

2mm Tile Spacer & Leveller Clip to ensure that all 6-12mm thick tiles are installed with an even 2mm grout gap and that all tiles are level to avoid lippage.
